

African Swine Fever Programme

African swine fever (ASF) has never been reported in Ireland.

The following ASF testing was carried out in Ireland in 2015:

- Serological testing of samples taken under the sow monitoring programme (2,229 sows from 198 herds slaughtered at the three EU approved slaughtering plants)
- Screening of clinical samples from carcasses submitted for post-mortem

Year	Test	No. of Samples	Positives	Negatives
2015	Ab ELISA	2,229	nil	2,228
2015	PCR	95	nil	95
2016	Ab ELISA	1,978	nil	1,978
